

# COVID-19 TESTING: URGENT CARE / WALK-IN CLINICS / DEPARTMENT OF HEALTH (DOH) – COLLIER COUNTY

## What you need to know about COVID-19 testing:

- Active COVID-19 testing requires swabbing a person's nasal passages. Names of this type of testing includes molecular, PCR and antigen.
- Antibody testing requires a blood sample. This test shows if a person may have had COVID-19. Based on test results, further testing may be required.
- The amount of time it takes to get the test result will vary. Ask at the time of testing when the test result will be available.
- Testing may be limited at certain locations based on the availability of supplies.
- If your physician requires upfront payment, take your receipt to your Benefits Office to see if you may be reimbursed for this cost.

Revised 10/8/2020
