

Mathematical Practice Standards

1		I can persevere to understand problems and solve them using multiple strategies.
2		I can use numbers and symbols to represent situations and understand how the numbers and symbols relate to the situation.
3		I can justify my thinking and explain why I agree/disagree with others.
4		I can represent and solve problems using various appropriate models.
5		I can estimate, then choose appropriate tools to help me solve problems, and verify my results.
6		I can work accurately and communicate my thinking clearly.
7		I can recognize patterns and use them to solve problems.
8		I can find and use efficient strategies that always work.
