

Mathematical Practice Standards

1		I can persevere to understand and solve problems using multiple strategies, while asking myself “Does this make sense?”
2		I can use numbers and symbols to represent situations and explain how the numbers and symbols relate to the situation.
3		I can justify my thinking and critique the reasoning of others.
4		I can represent and solve problems using various appropriate models that I adjust as needed.
5		I can estimate, then choose appropriate tools to help me solve problems, and verify my results to find possible errors.
6		I can solve problems accurately and communicate my thinking precisely.
7		I can recognize patterns and relationships and use them to solve problems.
8		I can find and use efficient strategies that always work, including algorithms and formulas.
