

## Homework Help:

### Set a regular time for homework

Your student will benefit from having a schedule and consistency. Setting a timer for assignments is helpful for some students that may drag out the process. Make sure you sit with your student or choose a location that you can still see and be a part of the process.

### Remove distractions

Turn it off! TV, phones, tablets, conversations any distraction that may interfere with concentration. Some students like soft music in the background but be sure to choose music without words. If you live in a small or noisy household, you may want to have this a time for ALL family members to engage in quiet activities such as reading during homework time.

### Get involved

Talk about the assignment. Does your student know what to do? How to complete it? What are the steps to completion? You don't necessarily have to know the answers to ask questions and review the work. Check for completion, understanding and effort. Be sure to praise throughout the process.

We have workshops available at many schools. Visit our website for dates of other workshops that might pique your interest! In addition we have videos and parent tips on our website and Twitter!
